FINDING GOLF CLUBS

To improve your score, you do not necessarily need the most expensive set of clubs—but you DO need the proper set. Unless you stand over 6 feet or under 5 feet, standard-size clubs should be correct for most men and women. Men's clubs are generally 1 inch taller per club.

The shaft is an essential consideration and, today, are usually composed of steel or graphite. While steel shafts are more durable, generally less expensive, and offer more control, they require a faster swing to generate longer distances.
